SOME OF THE PROJECTS I WORKED ON

- **Job board website (still in progress)**: Frontend done with React.js and backend with Node.js and MongoDB
- **Video search engine**: Web app done with React.js + Javascript + HTML + CSS
- **Reporting web app**: Web app done with Javascript + PHP/CodeIgniter + HTML + CSS
- **CRM Web app for sport clubs**: Web app done with the Python framework “Odoo V11” + XML

EXPERIENCES

- **DXC Technology** Rabat, Morocco
Software Engineer Oct 2018 - Jun 2019
 - I worked at DXC Technology as a consultant for the IT department of a big french client in the construction industry. My job was to develop and deploy new features on their ERP system.
- **Ismail Tlemcani** Rabat, Morocco
Freelance Web Developer + OSS Contributor Aug 2017 - Sep 2018
 - Independent Web developer for local and remote clients + contributor to open source projects. The tech stack used on the Frontend was React.js and on the Backend was Node.js for some projects and the Python framework “Odoo” for some projects.
- **VIKAT** Kenitra, Morocco
Web Developer Sep 2016 – Jan 2017
 - VIKAT is the leading factory of concrete precast products in Morocco. I worked there as a web developer and my job was to develop additional features for the ERP of the company. The tech stack used was mainly around Javascript and Python.
- **Hmizate.ma** Casablanca, Morocco
Web Developer Intern Feb 2016 – Jun 2016
 - Hmizate.ma is the leading daily deal website in Morocco. I developed a web app for a live reporting of the partners of the website. I used the framework PHP/CodeIgniter + Javascript during this work.

EDUCATION

- **Mälardalen University** Västerås, Sweden
Master's degree in Software Engineering Sep 2019 – June 2020
- **Institut National des postes et télécommunications** Rabat, Morocco
Master's degree in Information Technology Sep 2012 – June 2016
